

Eastern Arc Compatible Receivers

With the launch of Eastern Arc, customers installed with an Eastern Arc solution will now be required to have MPEG-4 only equipment, updated with our new 241 Smart Card technology. It is important to recognize the following information when working with an Eastern Arc customer and ordering the proper inventory for your business needs:

- 211k and ViP612 model receivers have already been updated with the new 241 encryption and will work in all Eastern Arc scenarios
- Eastern Arc compatible receivers can also be identified with the symbol [Ⓐ]
 - This symbol can be located on the receiver box label, indicating that the receiver has been updated with DISH Network's latest Smart Card technology and is eligible for Eastern Arc installations

Below is a list of receivers, along with their associated, new part numbers that have received the 241 Smart Card encryption update:
